No. 685

GENERAL MISCELLANEOUS BRANCH
No. 898-28
26 APR. 1928

Dear Mr. Ranga Rao,

In continuation of my D.O. letter No. C. 614 dated the 13th April 1928, I write to state that I completed the inspections of the Bangalore City a few days ago. The inspections were, among other things, directed towards an examination of children for "protection" against small-pox. Nearly 3,000 children were examined in the different parts of the City and I was impressed by the marked success of the cases vaccinated with our lymph during the last three or four months. I have to say, too, that vaccination work in this City is being carried on more systematically than in most other towns and that consequently there are comparatively fewer "unprotected" children to tackle during emergencies of impending out-breaks of small-pox.

As to the general sanitation of the City, the outstanding needs are the removal of congestion in the II, IIIrd and Vth Divisions and the introduction of improved drainage. The conservancy and supervision staff has to be augmented. Although working against these disabilities, the City Health Department has, on the whole, been acquitting itself fairly satisfactory - so far as the usual routine is concerned. At the same time, it must be admitted that there is scope for larger initiative in some matters. A detailed report embodying my notes of inspection is being drawn up and will be submitted shortly for the information and orders of Government.

8867/27/4

Yours sincerely,

For perusal
Joint-Member
Dewan.

Sans 87-27-5.

Proceedings of the Government of H. H. the Maharaja of Mysore.

Read:-

The accompanying report of the Sanit Commissioner in Mysore on the sanitary survey of the Bangalore City based on hi inspection of the City in April 1928.

Order No. G. 9096-9.

Dated Bangalore, 28.1.29.

As a result of certain disquieting features which Government observed in th public health of Bangalore, they request the Sanitary Commissioner to make a care examination of the sanitary condition of City and furnish a report to Government. The report read above has been submitted by the Sanitary Commissioner in accordan with their request. Government have per ed it with interest and desire to thank Dr. Usmon for his ~~interesting~~ painstaking and useful report.

The Sanitary Commissioner states that the minor sanitary defects observed by him during his inspection are of the nature usually found in most big cities. He has pointed them out to the Health Officer of the Municipality with suitabl suggestions for their improvement. Gover ment hope that the Municipal Council wil afford the necessary facilities to the Health Officer to give effect to the suggestions of the Sanitary Commissioner

The more important suggestions made by the Sanitary Commissioner relate

to the following:--

I. Improvement of the Registration of Vital Statistics.

II. Maternity Aid and Reduction of Infant Mortality.

III. Prevention of communicable diseases.

IV. Improvement of General Sanitation with special reference to :

(a) Conservancy,

(b) Abatement of Fly Nuisance,

(c) Drainage, and

(d) Relief of congestion and Housir the poor.

V. Protection of Food Supply and drink. with special reference to --

(1) Control of Coffee Clubs, eating houses and hotels.

(2) Petty Vendors of sweets, etc.

(3) Adulteration of Food stuffs.

(4) Bakeries and Confectionaries.

(5) Aerated Water Factories.

(6) Dairies and Milk Supply, and

(7) Slaughter Houses.

Government propose to deal briefly with each of these suggestions:--

I. Registration of Vital Statistics:--

The Sanitary Commissioner suggests, among other things, that the production death certificates should be insisted upon before permitting the disposal of dead bodies. The Municipal Council is requested to examine the Sanitary Commissioner's suggestion. Arrangements may also be made for the grant of birth certificates. The compilation of Vital Statistics requires to be more carefully and intelligently undertaken.

II. Infant Mortality and Maternity Aid

Government note with pleasure that there has been a gradual decline in infant mortality during the past 8 years. But there is ample room for still greate reduction of infant mortality and they agree with the Sanitary Commissioner in his view that a great deal of individual effort and collection propoganda are required. Government hope that the Municipal Council will take early action to op Infant Welfare Centres and Maternity hom in the congested portions of the City as suggested by the Sanitary Commissione: The question of the establishment of a "Creche" requires the early consideratio: of the Municipality.

III. Chief Communicable diseases.

Plague. With a view to prevent recrude- scence of epidemics in future, the Sanita: Commissioner suggests the extensive dest: tion of rats, the systematic examination of rodents for plague infection on more intelligent lines than those obtained at present and the adoption of suitable bye laws for securing rat proof granaries an go-downs. Government agree with the Sani- tary Commissioner that action in the dir tions indicated above is necessary and t City Municipal Council is requested to take the necessary measures.

Small-Pox. The Sanitary Commissioner states that short of a compulsory Regula- tion the most effective way of pushing revaccination through is by means of a rule requiring all candidates for the

L.S. Examination and all new entrants to service to produce revaccination certifi dates. Government consider that a genera Regulation making revaccination compulso is not expedient. The alternative sugges tion to insist on the production of re- vaccination certificates from candidates for the L.S. Examination and all new en- trants into public service appears to be more practicable but since it is of - general application all over the State, Government propose to consider this sub- ject further and deal with it as a gene question. The suggestion to have lists of unprotected children based primarily on birth registers and to have every bi recorded on the vaccination State Regis- ter is approved. The Sanitary Commissi er is requested to submit detailed prop sals.

Tuberculosis and Typhoid. The increas in the death rate from these preventi diseases is a matter of concern and the suggestions to combat these diseases wi it is hoped, receive very early conside tion of the Municipal Council. The main nance of spot maps for each division and the Educational Propoganda on the lines suggested by the Sanitary Commis- sioner can be undertaken without much expense. The President of the Municipal Council is requested to take necessary action in this matter and report the action taken for the information of Government.

Government, in agreement with the

Sanitary Commissioner consider it very essential that these two diseases as also the other chief communicable diseases viz plague, small-pox, cholera etc should be made compulsorily notifiable and ~~accordingly direct~~ demi that suitable bye laws may be framed and submitted to Government for approval.

Malaria. The proposals recommended under this head will be referred to Dr. Sweet for consideration in connection with his proposals for dealing with the malaria problem in the State.

Hook-worm disease. The suggestion of the Sanitary Commissioner to have the children in the several schools of the City examine for hook-worm infection (manifest or laten is approved. The Senior Surgeon is requested to issue in consultation with Dr. Sweet necessary instructions in the matter to the special medical staff appointed for the medical examination of school children in the City.

IV. General Sanitation.

(a) The recommendations to prescribe type designs for house latrines, the employment of motor lorries for the carriage of rubbish and night soil, the opening out of conservancy lanes in those parts of the City where privy pits are still in use should receive the ~~first~~ very early attention of the Municipal Council. The ~~Municipal Commissioner~~ President, Board Council is requested to place before the Municipal Council, the recommendation of the Sanitary Commissioner for the use of

incinerators for the ultimate disposal of refuse.

(b) Abatement of Fly Nuisance. Printed leaflets in English, Kannada and Hindustan explaining the treatment of stable manure and the evils resulting from its accumulation may be freely distributed among stable owners and the Inspecting Staff instructed to pay particular attention to the prompt removal of stable manure. The Council may further examine the desirability of framing suitable bye laws in the matter and making departures therefrom sanitary offences.

(c) Drainage. The Sanitary Commissioner has, in minute detail, described how defective and inadequate the drainage of the City is and suggests that the question of improving it may be investigated by an expert committee. The Municipal Council is requested to consider the matter.

(d) Relief. of Congestion and Housing the poor.

In the opinion of the Government, the recommendations of the Sanitary Commission to relieve congestion in the old city and to house the poor are generally acceptable. The Municipal Commissioner is requested to report, in consultation with the Municipal Council, how far these recommendations can be given effect to during the next two years. Early action should be taken for improving the existing Municipal hutting grounds and the licensing and inspection of private hutting grounds as suggested by the Sanitary Commissioner. The

31

The Registrar of Co-operative Societies is also requested to examine and report to what extent co-operative housing is possible.

V. (1-5) Protection of Food Supply etc. Separate orders will issue regarding the proposal to introduce the system of licen ing coffee clubs, hotels, eating houses, bakeries, aerated water factories and sweetmeat shops. In the meanwhile, the City Municipal Council is requested to examine the proposals of the Sanitary Com missioner in the matter and suggest ways and means.

(6) Dairies and Milk Supplies. Gove rnmen are constrained to observe that the pre- sent insanitary condition of the so-calle dairies which are in reality mere cattle ----sheds, is a standing reproach to the ----sanitary administration of the City and the explanation that the problem of regulating the dairies bristles with difficulties as it ~~as~~ involves vested interests of the milkmen and the consume cannot ~~be accepted~~ accepted. Government hope that the ~~Municipal Commissioner~~ President of the Municipality will take ear action for a systematic inspection of the cattle sheds and a rigid enforcement of the existing bye laws so as to ensure the supply of pure milk to the general public.

(7) Slaughter Houses. The improveme recommended by the Sanitary Commission should be effected without delay.

Regulation of sale of drugs and sh saloons.

(8) Rule 9 Sch 7 drugs & shaving saloons

Government agree with the Sanitary Commissioner in his opinion that bye laws are necessary to enforce the employment of trained and certified compounders in the Chemists and Druggists Shops and to bring shaving saloons under sanitary control. The Municipal Council is requested to frame suitable bye laws and forward them for the consideration of Government.

Swimming Ponds. The suggestion to provide and maintain an artificial swimming bath commends itself to Government and they hope that it will receive favourable consideration by the Municipality and necessary action taken by them.

General. A suitably equipped laboratory and an assistant to the Health Officer of the Municipality to relieve him of a portion of routine work and to help him in the laboratory appear desirable. The suggestion to augment the conservancy staff also deserves consideration. It is satisfactory to note that systematic vaccination has been attempted with good results but greater effort is still necessary.

Conclusion. The City Municipal Council is requested to consider the various suggestions of the Sanitary Commissioner not dealt with in this ~~above~~ order and to submit their views to Government.

The Deputy Commissioner, Bangalore Dist.
The Chief Engineer of Mysore.

Copy to L.S.G. Branch.

CP.
12-1-29.

Government of His Highness the Maharaja of Mysore.

GENERAL AND REVENUE DEPARTMENTS.

G. O. No. G. 9096-9—Sany. 87-27-5, dated 28th January 1929.

Sanitary Survey of the Bangalore City.

Passes orders on the report of the Sanitary Commissioner on the ——.

READ—

The accompanying report of the Sanitary Commissioner, Mysore, on the Sanitary Survey of the Bangalore City based on his inspection of the City in A

ORDER No. G. 9096-9—SANY. 87-27-5, DATED 28TH JANUARY 1929.

As a result of certain disquieting features which Government observed in the public health of Bangalore, they requested the Sanitary Commissioner to make a careful examination of the sanitary condition of the City and furnish a report to Government. The report read above has been submitted by the Sanitary Commissioner in accordance with their request. Government have perused it with interest and desire to thank Dr. Usmon for his painstaking and useful report.

The Sanitary Commissioner states that the minor sanitary defects observed by him during his inspection are of the nature usually found in most big cities. He has pointed them out to the Health Officer of the Municipality with suitable suggestions for their improvement. Government hope that the Municipal Council will afford the necessary facilities to the Health Officer to give effect to the suggestions of the Sanitary Commissioner.

The more important suggestions made by the Sanitary Commissioner relate to the following:—

I. Improvement of the Registration of Vital Statistics.
II. Maternity Aid and Reduction of Infant Mortality.
III. Prevention of communicable diseases.
IV. Improvement of General Sanitation with special reference to—
  (*a*) Conservancy,
  (*b*) Abatement of Fly Nuisance,
  (*c*) Drainage, and
  (*d*) Relief of congestion and Housing the poor.
V. Protection of Food Supply and drink with special reference to—
  1. Control of Coffee Clubs, eating houses and hotels.
  2. Petty Vendors of sweets, etc.
  3. Adulteration of Food stuffs.
  4. Bakeries and Confectionaries.
  5. Aerated Water Factories.
  6. Dairies and Milk Supply, and
  7. Slaughter Houses.

Government propose to deal briefly with each of these suggestions:—

I. REGISTRATION OF VITAL STATISTICS.

The Sanitary Commissioner suggests, among other things, that the production of death certificates should be insisted upon before permitting the disposal of dead bodies. The Municipal Council is requested to examine the Sanitary Commissioner's suggestion. Arrangements may also be made for the grant of birth certificates. The compilation of Vital Statistics requires to be more carefully and intelligently undertaken.

No. G. 9096-9—Sany. 87-27-5, dated 28th January 1929.

II. Infant Mortality and Maternity Aid.

Government note with pleasure that there has been a gradual decline in infan mortality during the past eight years. But there is ample room for still greater reduc tion of infant mortality and they agree with the Sanitary Commissioner in his viev that a great deal of individual effort and collective propaganda are required. Gov ernment hope that the Municipal Council will take early action to open Infant Welfar Centres and Maternity homes in the congested portions of the City as suggested by th Sanitary Commissioner. The question of the establishment of a "Creche" require the early consideration of the Municipality.

III. Chief Communicable Diseases.

Plague.—With a view to prevent recrudescence of epidemics in future, the Sani tary Commissioner suggests the extensive destruction of rats, the systematic examinatio of rodents for plague infection on more intelligent lines than those obtaining at presen and the adoption of suitable bye-laws for securing rat proof granaries and go-downs Government agree with the Sanitary Commissioner that action in the direction indicated above is necessary and the City Municipal Council is requested to take th necessary measures.

Small-Pox.—The Sanitary Commissioner states that short of a compulsory Regu lation the most effective way of pushing revaccination through is by means of a rul requiring all candidates for the Lower Secondary Examination and all new entrant to service to produce revaccination certificates. Government consider that a genera Regulation making revaccination compulsory is not expedient. The alternative sugges tion to insist on the production of revaccination certificates from candidates for th Lower Secondary Examination and all new entrants into public service appears to b more practicable but since it is of general application all over the State, Governmer propose to consider this subject further and deal with it as a general question. Th suggestion to have lists of unprotected children based primarily on birth registers an to have every birth recorded on the vaccination State Register is approved. The San tary Commissioner is requested to submit detailed proposals.

Tuberculosis and Typhoid.—The increase in the death rate from these preven able diseases is a matter of concern and the suggestions to combat these diseases wil it is hoped, receive very early consideration of the Municipal Council. The mainter ance of spot maps for each division and the Educational Propoganda on the line suggested by the Sanitary Commissioner can be undertaken without much expens The President of the Municipal Council is requested to take necessary steps in thi matter and report the action taken for the information of Government.

Government, in agreement with the Sanitary Commissioner, consider it very essen tial that these two diseases as also the other chief communicable diseases, *viz.*, plagu small-pox, cholera, etc., should be made compulsorily notifiable and desire that suitabl bye-laws may be framed and submitted to Government for approval.

Malaria.—The proposals recommended under this head will be referred t Dr. Sweet for consideration in connection with his proposals for dealing with th malaria problem in the State.

Hook-worm Disease.—The suggestion of the Sanitary Commissioner to hav the children in the several schools of the City examined for hook-worm infectio (manifest or latent) is approved. The Senior Surgeon is requested to issue in consulta tion with Dr. Sweet, necessary instructions in the matter to the special medical sta appointed for the medical examination of school children in the City.

IV. General Sanitation.

(*a*) The recommendations to prescribe type designs for house latrines, th employment of motor lorries for the carriage of rubbish and night soil, the openin out of conservancy lanes in those parts of the City where privy pits are still in us should receive the very early attention of the Municipal Council. The Presiden Municipal Council, is requested to place before the Municipal Council, the recom mendation of the Sanitary Commissioner for the use of incinerators for the ultimat disposal of refuse.

(*b*) *Abatement of Fly Nuisance.*—Printed leaflets in English, Kannada and Hindustani explaining the treatment of stable manure and the evils resulting from its accumulation may be freely distributed among stable owners and the Inspecting Staff instructed to pay particular attention to the prompt removal of stable manure. The Council may further examine the desirability of framing suitable bye-laws in the matter so as to make departures therefrom, sanitary offences.

(*c*) *Drainage.*—The Sanitary Commissioner has, in minute detail, described how defective and inadequate the drainage of the City is and suggests that the question of improving it may be investigated by an expert Committee. The Municipal Council is requested to consider the matter.

(*d*) *Relief of Congestion and Housing the Poor.*—In the opinion of Government, the recommendations of the Sanitary Commissioner to relieve congestion in the old city and to house the poor are generally acceptable. The Municipal Commissioner is requested to report, in consultation with the Municipal Council, how far these recommendations can be given effect to during the next two years. Early action should be taken for improving the existing Municipal hutting grounds and the licensing and inspection of private hutting grounds as suggested by the Sanitary Commissioner. The Registrar of Co-operative Societies is also requested to examine and report to what extent co-operative housing is possible.

(1 to 5.) *Protection of Food Supply, etc.*—Separate orders will issue regarding the proposal to introduce the system of licensing coffee clubs, hotels, eating houses, bakeries, aerated water factories and sweetmeat shops. In the meanwhile, the City Municipal Council is requested to examine the proposals of the Sanitary Commissioner in the matter and suggest ways and means.

6. *Dairies and Milk Supplies.*—Government are constrained to observe that the present insanitary condition of the so-called dairies which are in reality mere cattle sheds, is a standing reproach to the sanitary administration of the City and the explanation that the problem of regulating the dairies bristles with difficulties as it involves vested interests of the milkmen and the consumers is not acceptable. Government hope that the President of the Municipality will take early action for a systematic inspection of the cattle sheds and a rigid enforcement of the existing bye-laws so as to insure the supply of pure milk to the general public.

7. *Slaughter Houses.*—The improvements recommended by the Sanitary Commissioner should be effected without delay.

8. *Regulation of sale of drugs and shaving saloons.*—Government agree with the Sanitary Commissioner in his opinion that bye-laws are necessary to enforce the employment of trained and certified compounders in the Chemists' and Druggists' shops and to bring shaving saloons under sanitary control. The Municipal Council is requested to frame suitable bye-laws and forward them for the consideration of Government.

Swimming Ponds.—The suggestion to provide and maintain an artificial swimming bath commends itself to Government and they hope that it will receive favourable consideration by the Municipality and necessary action taken by them.

General.—A suitably equipped laboratory and an assistant to the Health Officer of the Municipality to relieve him of a portion of routine work and to help him in the laboratory appear desirable. The suggestion to augment the conservancy staff also deserves consideration. It is satisfactory to note that systematic vaccination has been attempted with good results but greater effort is still necessary.

Conclusion.—The City Municipal Council is requested to consider the various suggestions of the Sanitary Commissioner not dealt with in this order and to submit their views to Government.

Chief Secretary to the Government of
H.H. the Maharaja of Mysore, Bangalore.

SIR,

With reference to your No. G. 1447 dated the 16th Instant in the matter of construction of an Epidemic Diseases Hospital at Chickmagalur, I have the honour to state that I have not heard any thing further to what I communicated to Government in my letter No. C. 397-21 dated 17th February 1930 though subsequent to that date the President of the Municipality has been written reminders. It is apparent that they are not keen on construction of any hospital, owing to financial difficulty, nor do I consider there is any urgent need for one at present. I would therefore recommend that the question may be closed now and reopened when the President, Chickmagalur Municipali addresses Government again.

I have the honour to be

Sir,

Your most obedient servant

Director of Health.

Bangalore, Mysore,

December 26, 1927.

Sir,

As a result of our conference it appears that t Government of Mysore is desirous of making certain changes in its health organization with the hope of being able to deal more effectively with its health problems. It is my understanding that:

(a) The office of Director of Health is to be created, with essential subsidiary divisions; (b) the Senior Surgeon and the Director of Health are to enjoy equal status in their respective fields and are to be directly responsible to a member of council, whose duties, as far as practicable, will be solely concerned with these fields of activity; (c) in addition to the lakh that the Central Government now budgets for health, it is the intention to add another lakh and a half for expansion of such activities as the Director of Health may deem desirable; (d) that Government will immediately bring about the separation of medical relief and public health and appoint a Director of Health; (e) as soon as practicable divisions of Epidemiology, laboratories, sanitary engineering, and public health education will be organized and other divisions will be created as circumstances

warrant.

If Government decides upon the foregoing reorganization that I am prepared to recommend to the Rockefeller Foundation/the following co-operation be offered.

The Rockefeller Foundation to provide:

1. A Consultant in Public Health.

2. A Sanitary Engineer who would be appointed chief of the sanitary engineering division and whose advice would be available to Government in the installatiom of water supplies, for the control of soil pollution, the study and control of malaria, and other matters in the field of sanitary engineering. If practicable a fellowship will be granted in sanitary engineering, the holder to relieve our engineer as head of the division as soon as possible after his education is completed.

3. If the Director of Health decides to organize a rural health unit, the Rockefeller Foundation will contribute Rs.5,000 toward a budget of not less than Rs.13,000 yearly.

4. If the Director of Health decides to organize a field experimental unit for the study and control of malaria the Rockefeller Foundation will contribute Rs.5,000 toward a budget of not less than Rs.15,000 yearly.

5. In addition to the foregoing the Rockefeller Foundation would like the Mysore Government to feel that it may call upon its central office for special advice.

The Mysore Government to provide:

1. The Consultant in Health and the Sanitary Engineer with an adequately equipped office with necessary clerical assistance, mail, telephone, and telegraph facilities and the legal status that are allowed to the Director of Health.

2. That the present transportation facilities and the exemption from taxes and tolls be continued.

3. At least two foreign fellowships a year or as many fellowships in India as the allotment for foreign fellowships will permit. The nomination of fellows is to be made upon the joint recommendation of the Director of Health and the Consultant in Health.

The foregoing arrangement is to remain in effect for a period of two years, this period in each project to date from the beginning of the full programme.

The Rockefeller Foundation desires me to avail myself of this opportunity to express, on behalf of its representatives, its appreciation of the many courtesies that have been extended by the Government of Mysore. Doctor Heiser wishes me particularly to mention his persona gratitude for the many facilities which were placed at his disposal and to tell you of his pleasure in the many manifestations by officials and people of keen interest in the advancement of public health.

With the sincere hope that the adoption of the above projects may prove of assistance to the Mysore Government i its laudable desire to bring about the alleviation of sufferi and the prevention of disease,

I have the honour to be,

Sir,

Yours respectfully,

The Honourable,
The Dewan of Mysore,
Bangalore

Dear Sir/Madam,

[redacted]0498-9 9/13.[redacted]28 I am directed to acknowledge, with thanks, the receipt of your interesting report on combating venereal diseases in the State which has been perused by Government with great interest. I hope that you have [redacted] received a copy of the Order issued by thi[redacted]rnment in respect of some of the recommen[redacted]made by you and sent to you with this offi[redacted]letter No. G.9561-2/Med.126-26-13, dated the 16th February 1928. As regards the very comprehensive suggestions made in your valuable report, I am to state - that Government will give their earnest attention to them and the orders that may be passed by them will be communicated to you in due - - course.

I am to ask you to accept the thanks of His Highness' Government for the labour and time you have given on their behalf.

As suggested by you, your report will be -- translated into vernacular and copies will be -- distributed on a large scale.

Yours sincerely,

RB

CARTERET HOUSE

PUBLIC OFFICES,

Bangalore, 27th December 192

Dear Dr. Sweet,

I am directed to write this to you with reference to your D.O. letter dated the 26th December 1927.

Government have read with very great interest the details of the investigation which is being carried on by you and they are in general agreement with the suggestions made by you for the improvement of the Health Organisation obtaining in the State. Government propose, in the near future, to separate the office of the Director of Health from that of the office of the Senior Surgeon. They propose, also, to establish, as soon as practicable divisions of Epidemiology, Laboratories, Sanitary Engineering and Public Health Education. Other divisions will be created as circumstances warrant. To meet the cost of these activities, they will increase the budget of the Health Department by a sum of rupees one lakh next year. I may point out that the direct and indirect expenditure on public health matters incurred by the Government and by Local Bodies is well over a sum of Rs. 25 lakhs a year exclusing the amounts spent on water supply, conservancy and other measures in the larger towns such as Bangalore and Mysore. Government propose to increase this expenditure also as funds become available.

Government accept with grateful thanks the generous co-operation of the Rockefeller Foundation in the new organisation of our Health Department, and in their efforts to improve the health of the people. They are deeply grateful to the Foundation for their intention to spare the services of a Consultant in Public Health and of a Sanitary Engineer, who will be the head of the Sanitary Engineering Division of the Health Department and whose advice will be available to the Government in the

the installation of water supplies, for the control of soil pollution, the study and control of Malaria and other matters in the field of Sanitary Engineering. They note also that the Foundation agree to contribute a sum of Rs. 15,000 for the organisation of a Rural Health Unit and of another sum of Rs. 5,000 for a Field experiment unit for the study and control of Malaria, and of their promise to grant two Fellowships.

Government will supply both the Consultant in Health and the Sanitary Engineer with an adequately equipped office and staff, telephone and telegraph facilities and to give them the status. They also agree to extend to these two officers the transport facilities and exemption from taxes and tolls that are being extended to you.

More than all, Government feel grateful to the Foundation for their kindness in allowing us to call upon their Central Office for special advice whenever occasion arises. Government have no doubt whatever that with the reorganisation of the Health Department as suggested by you and with the valuable advice which you and the Sanitary Engineering as well as the Central Office will be able to supply, they will in the near future be in a position to cope adequately with their main health problems.

Youre sincerely,

Dr. W.C. Sweet, M.D.,
Representative of the Rockefeller Foundation
in the Mysore State,
Bangalore.

D.O. No. C

General and Revenue Secretariat,

Bangalore, th December 1927.

Dear Dr. Heiser,

I am herewith enclosing a copy of a letter which has been sent to Dr. Sweet in reply to his letter of the 26th December. I am to state that Government have been deeply impressed with the earnest, able and comprehensive manner in which Dr. Sweet has been carrying on his investigations and they would be deeply grateful to you if you recommend to the Foundation that the services of Dr. Sweet be spared to this Government as -- Consultant in Health for a period of five years on the terms on which he is working for us just now. They wish to offer to you their deep and sincere thanks for the interest which you have taken in the matters that were brought to your notice during your stay here and fo for the sympathetic and friendly attitude which has been taken by you in their disposal. I am to extend to you, on behalf of the State, a cordial invitation to visit the State next year and to express the hope that you will be able to accept this invitation. By that time,

some at least of the beneficent measures inaugurated
under your suggestion will have produced some results.

Yours sincerely,

CABLE ADDRESS "ROCKFOUND"

Bangalore City,

December 30, 1927.

Dear Mr. Ranga Rao,

Having received your D. O. letter G 7305, dated the 27th December, I should like to express my appreciation of the hearty response of Government to my letter of December 26th. There is, however, a slight misunderstanding of the suggestions in regard to fellowships. The course I proposed was that the Rockefeller Foundation should be asked to provide one fellowship in sanitary engineering and that Government should provide at least two foreign fellowships a year, or as many fellowships in India as the allotment for foreign fellowships would permit, the nomination of fellows to be made upon the joint recommendation of the Director of Health and the Consultant in Health.

If you will kindly ascertain the views of Government upon these suggestions, I have no doubt that we will be able to proceed with the formulation of budgets for the full programme, copies of which the Rockefeller Foundation will wish to see and have on file.

Yours sincerely,

F. F. Russell

OFFICE OF THE COMPTROLLER TO THE GOVERNMENT
OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

No. A.II.1716.

Bangalore, dated 14th June *192*8.

From

S. SHAMANNA, Esq., B.A.,
Comptroller to the Government of
His Highness the Maharaja of Mysore,
BANGALORE.

To

Secretary to the Government of Mysore,
General Department,
Bangalore.

Sir,

Adverting to Government Order No.G.8171-3/San.40-27-2 dated 21-1-28 sanctioning the enhancement of the scholarship granted to Mr.C.V.Natarajan deputed to America for training under the Rockfeller Foundation by 2$ a month, I have the honour to state that the increase in the stipend rate has been authorised to be paid with effect from 15th September 1927 as claimed in the bill received from the Foundation.

I have the honor to be,
Sir,
Your most obedient servant,

for Comptroller.

MYSORE

Sep.24, 1927.

Dear Mr. Mirza:

Application for financial aid from the Rockefeller Foundation have to be sent officially from the Government through the local representative of the Foundation.- Dr. Sweet.

A Nurses' Training School and Home would be the object most likely to meet with their favourable consideration and the need is urgent.

A College Library is also a need and might come well within the Foundation's scope.

I do not think the Foundation would donate an hospital outright, but an Eye Hospital with its equipment would be a fine thimg to have and might be included in the list for them to choose from for a gift.

Yours sincerely,

F. Fletcher Robinson.

MYSORE,

17th October 1917.

Mirza;

The following is the list of objects for which we might ask financial aid of the Rockefeller Foundation through their representative, Dr. Sweet. I have listed them in the order in which I think they may be more favourably considered.

1. Nurses' Training School and Home. ✓
2. Maternity Hospital
3. Eye Hospital.
4. Library for the Medical College.

Yours sincerely,

M. Rahman.

NOTE—Contn. sheet

Rs 5303

Health Survey Office,
Care Senior Surgeon,
Bangalore.
October 30, 1927.

Dear Mr. Ranga Rao,

I am returning with this the draft of the letter to the Foundation which you sent me the other day. I have made certain suggestions on the margin. It would be well to emphasize the possibility of the extension of the facilities of the Nurses Training School to include Public Health Nursing when that branch becomes necessary in Mysore and the supply of trained nurses which the school will make available for such purposes. Also, I should stress more the relation of the Maternity and Eye Hospitals to the Medical College and their use for teaching purposes; they are, are they not, to be considered as parts of the equipment of the new Medical College. In view of the fact that Dr. Heiser will be in Mysore probably before the end of the year, I would advise you to consider the possibility of holding up the actual despatch of this letter until we have the advantage of Dr. Heiser's reaction. I think that submitting the whole matter to him before sending the letter would be a strategical proceeding.

2. Enclosed you will find a copy of a letter just received from the Foundation. I am sorry to have made these mistakes. Apparently my notes did not contain the latest regulations. It is not essential to change the provisions of Government Order #1395 which the Foundation will follow unless advised otherwise.

Yours sincerely,

The General Secretary to Government,
Public Offices,
Bangalore.

A letter has separately gone [illegible] and the further help from the R. Foundation [illegible]

2 copies of para 2 & the enclosure are taken for [illegible] action (Ref no 5303) Surgeon helpfully [illegible] Foundation [illegible] 6/11/27)

D. O. No.

GENERAL AND REVENUE SECRETARIAT,

Bangalore, 25th October 1927.

Send to Senior Surgeon's Office for despatching to Mr. Sweet who is reported to be coming in the Steamer

Dear Dr. Sweet,

I am herewith enclosing a draft application to the Rockefeller Foundation. I spoke to you about this when you last met me. I shall be deeply obliged if you could let me have it back with your suggestions. I need scarcely say that ~~as this is only a draft,~~ you are at liberty to alter it in any manner you like either in manner or matter. The object is to impress the Foundation favourably in respect of our request.

Yours sincerely,

RG

Dear Dr. Sweet,

I am directed to acknowledge, with thanks, the receipt of the 13th Annual Report of the Rockefeller Foundation which you very kindly sent to Governmen They have perused with deep interest th account given in the report of the successful efforts that are being made by the Foundation to help in the improve of health conditions in various parts o the world.

Government have already communicat to the Foundation their warm appreciati of the services rendered to them by the Foundation in letting them have the ben fit of your advice in improving the health conditions of Mysore and have al conveyed their thanks to the Foundation for the grant of Fellowships to three our students now under training in Amer They now propose to further approach th Foundation in some other matters.

You are aware of the various socia medical and health welfare schemes upon which this Government have embarked in recent years. You are also aware of th limited financial resources. In these circumstances, they desire to seek the help of the Foundation in the schemes referred to below:-

One of the main difficulties which

Government are now experiencing is in the matter of getting nurses for their medica institutions. ~~This difficulty will becom still more accentuated if the scheme of Public Health Nurses which, it is understood, is likely to be recommended by you, is introduced in Mysore.~~ They there fore, propose to establish a Nurses Train ing School and Home either at Bangalore or Mysore. The establishment of such a school will not only enable the Governmen to train up the nursing staff required for their own services, but will also attract to the nursing profession a large number of cultured Indian women. Govern- ment do not desire to saddle the Founda- tion with any part of the recurring worki charges of the institution. They would, however, be grateful if the Foundation would contribute a building grant of Rs. 3,00,000.

In view of the recent Railway exten- sions, the City of Mysore has become an important centre of trade and commerce an the Maternity, which just now fulfils the needs of the town, is likely to be found inadequate and will have to be considerab enlarged. For the same reason, the Eye Department of the Krishnarajendra Hospita at Mysore requires to be improved and brought to the same level of efficiency and usefulness as the Minto Opthalmic

Should a ~~scheme of~~ Public ealth Nursing Service be attempted y Government, the shortage ncrease would be accentuated nd facilities for post graduate raining in ~~this speciality~~ line ould be utterly inadequate

*Such a school and home ould enable Government to end the curriculum to clude Public Health Nursing hen conditions warrant and ould give a large number of dequately trained nurses om which the Public Health ursing staff could be drawn.

Government has made all plans to move the Medical College to Mysore, a site which seems more appropriate for such an institution. It is expected that this move will be made in the immediate future and the provision of adequate Maternity and Eye Hospital facilities are essential for the ~~proper functioning~~ the teaching in the Medical College. (Or words to that effect). The institutions in Bangalore will continue to be used in connection with the teaching in the Medical School (?).

Hospital at Bangalore. As Goyernment are already maintaining an up-to-date Maternity and Opthalmic Hospital at Bangalore, they would welcome any financial help which the Foundation may find it possible to extend to them for the maintenance and equipment of similar institutions in Mysore City. The extent of help required is about Rs. 1,00,000 in each case.

Lastly, in connection with the Medical College, which was established some years ago, it is necessary to build up a good medical, surgical and public health library, but Government have been unable so far to make suitable provision therefor. If the Foundation will find it possible to help the library with books or with a library grant or with both, Government would be deeply obliged for such kindness on the part of the Foundation.

I am to request you to place this letter before the Foundation for favour of favourable consideration.

Yours sincerely,

RJ

Dear Dr. Sweet,

I am in receipt of your letter dated the 30th October 1927 making certain suggestions in respect of the draft application to the Rockefeller Foundation, ~~for some financial help to the State~~. I am to thank you for the suggestions made by you which will be duly embodied in the letter to the Foundation. As suggested by you, the application will be held over pending Dr. Meiser's arrival in Bangalore. The matter may then be informally discussed before the letter is finally despatched.

I am taking necessary action in respect of the stipend due to Dr. Natarajan.

Yours sincerely,

RN 8/11

Dr. W.C. Sweet, B.Sc., M.D.,
Representative of the Rockefeller Foundation
in Mysore,
Care of the Senior Surgeon in Mysore,
Bangalore.

Dear Dr. Sweet,

I am directed to acknowledge, with thanks, the receipt of the 13th Annual Repor of the Rockefeller Foundation which you ver kindly sent to Government. They have perus with deep interest the account given in the report of the successful efforts that are being made by the Foundation to help in the improvement of health conditions in various parts of the world.

Government have already communicated the Foundation their warm appreciation of t services rendered to them by the Foundation in letting them have the benefit of your ac work and advice in improving the health con ditions of Mysore and have also conveyed th thanks to the Foundation for the grant of - Fellowships to the three Mysore students no under training in America. They now propos to further approach the Foundation in some other matters.

You are aware of the various social, medical and health welfare schemes upon whi this Government have embarked in recent yea You are also aware of their limited financi resources. In these circumstances, they de sire to seek the help of the Foundation in the schemes referred to below:--

(1) One of the main difficulties which Government are now experiencing is in the matter of getting nurses for their medical institutions. They therefore propose to - establish a Nurses Training School and Home

either at Bangalore or Mysore. The establishment of such a school will not only enable the Government to train up the nursi staff required for their own services, but will also attract to the nursing profession a large number of cultured Indian women who are unable to take to this profession for want of suitable training facilities. Such a School and Home would enable Government to extend the curriculum to include Public - Health Nursing when conditions warrant and would give a larger number of adequately trained nurses from which the Public Health Nursing Staff could be drawn. Government do not desire to saddle the Foundation with any part of the recurring working charges of the institution. They would, however, be grateful if the Foundation would contribute a building and equipment grant of Rs. 300,000.

(1) Mysore has already become an important centre of trade and commerce by reason of recent railway extensions and is bound to develop further when certain other projected railway schemes come to fruition. The existing facilities for the treatment of Materni and eye cases which fulfil the needs of the town at present will, I think, necessarily have to be enlarged to meet the requirements of the growing population. Further, Government have completed all plans to shift the - Bangalore Medical College to a convenient site at Mysore which seems more appropriate for an institution of this kind. It is

needless to say that the provision of adequate Maternity and Eye Hospital facilities are essential for the teaching in the Medical College. In this connection, it may also be stated that the existing institutio in Bangalore will have to be maintained at their present scale for teaching in the - Medical School which will continue in Bange lore. As it is impossible for Government to suitably equip two similar institutions both in Bangalore and Mysore, they would welcome any financial help which the - Foundation may find it possible to extend to them for the maintenance and equipment of the similar institutions in Mysore City. The extent of help required is about Rs.1,00,000 in each case.

Lastly, in connection with the Medical College, which was established some years ago, it is necessary to build up a good medical, surgical and public health library, but Government have been unable so far to make suitable provision therefor. If the Foundation will find it possible to help the Library with books or with a library grant or with both, Government will be deeply obliged for such kindness on the part of the Foundation.

I am to request you to place this letter before the Foundation for favour of favourable consideration.

Yours sincerely,
